

Associated British Ports South Wales

NOTICE TO MARINERS.

NO 4 OF 2020

Swansea Lock Inner Gate Replacement Programme

Swansea inner gate replacements will commence today Tuesday January 7th, with a planned completion for the 13th of January.

Subject to not having to undertake unexpected emergent works to pintles, it is expected that there will be no beam restriction in place throughout the above works period.

The outer lock chamber is expected to remain operational throughout the works period for vessels up to 92m LOA.

Throughout the period of works there will be periods on specific tides that no shipping will be able to move due to the actual fitting and removal of gates.

Please coordinate prospective vessel movements with Cardiff LPS and consider as a point of contact for program updates and vessel scheduling.

ABP will endeavour to provide updates to the program ASAP in respect to any potential changes.

Any questions should be directed to the ABP South Wales marine department by contacting Local Port Services.
