

## THIRD PARTY INCIDENT MANAGEMENT

A recent pollution incident caused by a tenant on ABP's estate has highlighted some key requirements we require each ABP site to ensure are in place:

- Ensure all tenants, customers and contractors on our sites are:
  - o Aware of the emergency contact details for ABP to use in the event of an incident.
  - o Reminded of the requirement to report pollution incidents to ABP as soon as is reasonably practical.
  - o Reminded of the need to seek permission from ABP before undertaking any excavation works e.g. to check for underground services, land quality risk etc.
- Ensure local environmental regulators have received up to date ABP emergency / incident contact details.

We have provided a template memo on the [CMS](#) to assist with the communication of the above to tenants, customer and contractors.

A check-point will be issued in 3 months time to confirm completion of the above.

Please contact Group Environment if you have any queries: [environment@abports.co.uk](mailto:environment@abports.co.uk)
